

Balancing Profit and Sustainability

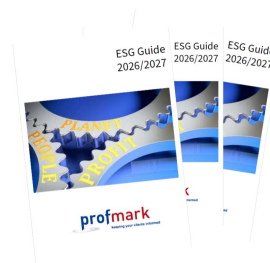

ESG Guide

Keep your clients informed on the importance of the Environment, Society and Governance in Business

This guide is an easy reference overview of the environmental and sustainability issues facing our planet, and incorporates information on the move towards a green economy in South Africa, as well as key sustainable business principles. Coupled with the Carbon Tax Act, 2019 and Climate Change Act, 2024 it is designed to inform and assist clients striving to incorporate sustainable development goals.

Content will incorporate inter alia:

- Environmental, Social and Governance practices in business (ESG)
- The 17 Sustainable Development Goals (SDG's)
- The Conference of the Parties (COP30)
- South African Environmental Legislation, Policies and Pledges
- King V and Sustainable Development/Integrated Reporting
- Green taxes and Environmental Allowances in South Africa
- South African Green Finance Taxonomy
